

REMARKS

With one exception, the foregoing amendments all serve the same purpose, namely to remove discrepancies between the specification and drawings as to the numbering of Figures 2A, 2B, 3A, 3B, 4A, 4B and 4C. The drawings filed with this application correctly identified these Figures by the use of capital letters, in accordance with 37 CFR 1.84(u)(1), but, for reasons unclear to the present attorney, the specification identified these Figures by the use of lower case letters. The foregoing amendments remove this discrepancy, thus rendering the specification consistent with the drawings.

The sole exception is the amendment at page 5, line 24, where the original text referred simply to "Figure 2" without specifying whether Figure 2A or 2B was intended. Since the "four display elements 110" mentioned at page 5, line 24 are shown in Figure 2A but not in Figure 2B, this line has now been corrected to refer to Figure 2A.

Entry of this Amendment is respectfully requested under 37 CFR 1.312 on the grounds that it will not require extensive consideration by the Examiner, being confined strictly to removal of obvious errors in the application as originally filed, but that it will facilitate understanding of the issued patent.

Respectfully submitted

David J. Cole
